"Golden Age": Pushback & Feedback

After weathering three major shocks in six years, fuel markets continue to demonstrate remarkable resilience. We see further upside to the refining cycle, with Asian refiners set to enjoy a higher than usual mid-cycle as the market overstates new capacity adds and understates ongoing disruptions.

1.Global Refinery utilisation is only 80%. Why do we see a Golden Age? Isn't the conflict key to the margins being above mid-cycle? Refining is a key bottleneck to the oil ecosystem, like power is for AI (see [Energy: Supercycle Recharges](#)). Hence we have seen fuel margins rise very consistently in Asia since 2021 and refinery level profitability has nearly risen 50% over five years. Most Asian and US refineries have reported 95% utilisation in last three years on average with refiners in India, Thailand and Malaysia reporting 100%+ utilisation rates. We believe refiners that are not able to operate at full run rates in the current margin environment, may struggle ([Exhibit 2](#)). Utilisation rate of 85% was also the peak in the last upcycle as refineries need to take downtime for maintenance every year and see large turnarounds every three to four years ([Exhibit 4](#)).

Even post-conflict, we believe refining margins should settle 20% above pre-conflict levels for diesel and gasoline and our bullish view only got reaffirmed as conflict-led disruptions have led to significant tightness in an already tight market with declining fuel inventories (more: [Refiners: The "Golden Age"](#) and [Why Crack Spreads Are So High](#))

2.What are the differences within countries to play the Golden Age in Asia?

Thailand and Korea offer the purest plays to a refining upcycle with limited challenges around windfall taxes on fuel products. India has capped fuel product margins to near US\$20-25/bbl for diesel and gasoline which benefits only from the highest capacity add globally. Japan and Australia have dynamics around fuel retail margins, but during an upcycle do benefit from higher fuel cracks. On an average US \$1/bbl rise in diesel margins imply 20-30% for our key picks – TOP TB, SPRC TB, S-Oil, HPCL NS, AMPOL and BCP TB ([Exhibit 7](#)).

3.What's the new mid-cycle margins; are there triggers for stocks or do they fall as GRMs decline from the highs?

Refining equities are pricing in mid-cycle margins, but we see the new mid-cycle to be 35% higher than last three cycles due to the market overestimating the supply and underestimating the supply disruptions ([Exhibit 5](#)). With well supplied oil markets in 2027, we do see crude discounts adding another layer of upside for fuel refiners in Asia. The recent Dubai crude discount over Brent of nearly US\$6/bbl highlights this dynamic as well. We see 40-60% upside to Street 2027 and 2028 EPS estimates for our key picks.

4. China export increases will de-rail the golden age:

12% since 2012-2022 and have been flat since then ([Exhibit 13](#)). We do see need for fuel exports from China as there is limited new refining capacity available elsewhere. With broader availability of discounted crude now, we see teapots in China having limited edge over peers regionally. Also China domestic fuel consumption has struggled more recently ([Exhibit 9](#)).

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
