

## Fed Chatterbox: July Edition

*The Fed Chatterbox highlights notable comments on key topics from Fed officials since the last FOMC meeting. A few themes stand out:*

- Speaking after the soft June CPI report, though before the further increase in oil prices during the blackout period, Vice Chair Jefferson said, “[The current] policy stance should continue to support the labor market while allowing inflation to resume its decline toward our 2% target as the effects of past tariffs and energy prices pass through completely.” President Williams similarly said that “The current stance of monetary policy is well positioned” to return inflation to 2%.
- In contrast, President Logan, also speaking after the June CPI report, said “I currently believe modestly higher interest rates would better balance the outlook and risks for the FOMC’s dual mandate goals.”
- Many participants tied future decisions about whether to hike to upcoming inflation data. Several shared Vice Chair Jefferson’s view that “In a scenario where actual inflation does not start to cool down soon, I believe that it could be appropriate to reconsider our current policy stance to ensure we fulfill our commitment to deliver price stability.” Similarly, Governor Cook said, “If we do not see signs of disinflation soon, I am prepared to act,” and President Hammack said, “Right now, I see no tension in our mandates—inflation is too high and if that continues, it may mean that we need higher interest rates to bring inflation back down to target.”
- At the same time, Vice Chair Jefferson, Governor Waller, and President Williams commented that they would support maintaining the current policy stance if inflation appears to be moving in the right direction over the next several months.
- Several participants commented on why inflation remains elevated. They largely agreed with President Williams, who noted that it “primarily reflects three drivers: the effect of higher tariffs on imported goods; supply chain disruptions and higher energy and commodity prices owing to the conflict in the Middle East; and the robust demand for certain categories of goods and electricity associated with the surge in technology investment.”
- Some participants worried about the consequences of inflation remaining high. Several shared Vice Chair Jefferson’s concern that “The quick succession of shocks raises the risk that inflation becomes entrenched and inflation expectations become unanchored.” A few also shared Governor Waller’s concern that “if this upward trend continues, it will be hard to push inflation back toward

## The Policy Outlook

| Date    | Speaker   | Key Quote(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Venue                   |
|---------|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| July 16 | Jefferson | 1. [The current] policy stance should continue to support the labor market while allowing inflation to resume its decline toward our 2 percent target as the effects of past tariffs and energy prices pass through completely.<br>2. In a scenario where actual inflation does not start to cool down soon, I believe that it could be appropriate to reconsider our current policy stance to ensure we fulfill our commitment to deliver price stability.                                                                        | <a href="#">Remarks</a> |
| July 16 | Schmid    | In some ways the “looking through” inflation supply shocks approach to monetary policy is already embedded in the way that many economists talk about the economy. This is something I would like to see changed.                                                                                                                                                                                                                                                                                                                  | <a href="#">Remarks</a> |
| July 16 | Logan     | 1. I currently believe modestly higher interest rates would better balance the outlook and risks for the FOMC’s dual mandate goals.<br>2. In my view, we should not perpetually achieve one goal while missing the other. History shows that when central banks try to hold down unemployment by accepting persistent inflation, they often end up with more inflation and more unemployment.                                                                                                                                      | <a href="#">Remarks</a> |
| July 15 | Cook      | If we do not see signs of disinflation soon, I am prepared to act.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <a href="#">Remarks</a> |
| July 15 | Williams  | With inflation running high, it is imperative that we restore it to the Federal Reserve’s 2 percent longer-run goal on a sustained basis. The current stance of monetary policy is well positioned to do that.                                                                                                                                                                                                                                                                                                                     | <a href="#">Remarks</a> |
| July 13 | Waller    | 1. The FOMC has to be ready to tighten monetary policy to prevent a repeat of the 2021-to-2022 inflation episode.<br>2. I will need to see several months of lower readings to feel that inflation is moving in the right direction... I think that is still a reasonable outcome, and I would then continue to hold the policy rate at its current target range.<br>3. If we get another hot reading on core inflation [in the June CPI report], then the FOMC will need to consider tightening monetary policy in the near term. | <a href="#">Remarks</a> |
| June 30 | Hammack   | Right now, I see no tension in our mandates—inflation is too high and if that continues, it may mean that we need higher interest rates to bring inflation back down to target.                                                                                                                                                                                                                                                                                                                                                    | <a href="#">Remarks</a> |
| June 26 | Kashkari  | In the June SEP, I penciled in one rate hike by the end of the year.                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <a href="#">Remarks</a> |

## Inflation

| Date    | Speaker   | Key Quote(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Venue                   |
|---------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| July 16 | Jefferson | The quick succession of shocks raises the risk that inflation becomes entrenched and inflation expectations become unanchored.                                                                                                                                                                                                                                                                                                                                                                                                                      | <a href="#">Remarks</a> |
| July 16 | Schmid    | 1. Though [the June CPI] data showed an encouraging deceleration, it would be premature to put too much weight on a single data point relative to recent trends.<br>2. With the price of oil once again rising, it is uncertain how persistent any relief on energy will be... Our inflation problem is not only about energy. Excluding energy, inflation is still running solidly above 2 percent.<br>3. I am uncomfortable ever assuming that a burst of inflation is likely to be temporary. Inflation shocks are not intrinsically transitory. | <a href="#">Remarks</a> |
| July 16 | Logan     | Inflation does not appear to be headed sustainably back all the way to 2 percent... My best judgment is that inflation appears to be heading toward the mid 2’s—not all the way back to 2 percent.                                                                                                                                                                                                                                                                                                                                                  | <a href="#">Remarks</a> |
| July 15 | Cook      | 1. The risks from high inflation concern me more at this time.<br>2. Rising core goods prices underscore the fact that the recent acceleration in inflation is not only an energy price story.<br>3. Going forward, though, I believe the risks continue to be strongly weighted toward higher inflation for at least two reasons... First, the AI buildout does not show signs of slowing.... Second, the recent big supply shocks—tariffs and the Middle East conflict—risk                                                                       | <a href="#">Remarks</a> |

| Date    | Speaker  | Key Quote(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Venue                   |
|---------|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
|         |          | leading to persistently higher inflation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                         |
| July 15 | Williams | 1. Inflation is unquestionably too high.<br>2. This elevation primarily reflects three drivers. The first is the effect of higher tariffs on imported goods. The second is supply chain disruptions and higher energy and commodity prices owing to the conflict in the Middle East. And the third is the robust demand for certain categories of goods and electricity associated with the surge in technology investment.<br>3. There are encouraging reasons to expect that inflation has peaked and should edge down in coming quarters. | <a href="#">Remarks</a> |
| July 14 | Warsh    | 1. The FOMC has no tolerance for persistently elevated inflation.<br>2. The FOMC's job is to make sure that any short-term changes in particular prices don't broaden out, don't change to a generalized change in the price level.                                                                                                                                                                                                                                                                                                          | <a href="#">Remarks</a> |
| July 14 | Goolsbee | On the inflation side, we have more of a problem... Now we need to start having the conversation about whether inflation is going to be more persistent than we want it to be.                                                                                                                                                                                                                                                                                                                                                               | <a href="#">Remarks</a> |
| July 13 | Waller   | I am concerned about the elevated pace of core inflation this year, which has steadily moved up. Because core inflation is a good guide to future inflation, I am concerned that, if this upward trend continues, it will be hard to push inflation back toward the Committee's 2 percent goal with monetary policy at its current setting.                                                                                                                                                                                                  | <a href="#">Remarks</a> |
| June 26 | Kashkari | Inflation has been high for five years, I think that's one way of saying we're behind the curve. We need to get it back down.                                                                                                                                                                                                                                                                                                                                                                                                                | <a href="#">Remarks</a> |

## Disclosure Appendix

### Reg AC

We, Jan Hatzius, David Mericle, Alec Phillips, Ronnie Walker, Elsie Peng, Pierfrancesco Mei and Jessica Rindels, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

**Contributing Authors:** Jan Hatzius Goldman Sachs & Co. LLC, David Mericle Goldman Sachs & Co. LLC, Alec Phillips Goldman Sachs & Co. LLC, Ronnie Walker Goldman Sachs & Co. LLC, Elsie Peng Goldman Sachs & Co. LLC, Pierfrancesco Mei Goldman Sachs & Co. LLC, Jessica Rindels Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

### Disclosures

#### Regulatory disclosures

##### Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

##### Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who

would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

**European Union and United Kingdom:** Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

**Japan:** Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

## Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

**European Economic Area:** Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

## General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global

Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
